

# DOG NOSE JOB™

## The perfect grooming aid for that show dog nose.

Whether your **Dog Nose Job** is strictly vanity for cosmetic reasons, or you want to moisturize and soothe a sore nose, **Green Udders** brand **Dog Nose Job** may be the final fix you need. The perfect antidote for those problematic dry, cracked, flaky and crusty canine noses with natural UV protection built in. Also works fantastic for scar reduction on both old and new scars. No nose issues? Pamper your pooch with the luxury spa treatment of a well hydrated picture perfect show dog nose. Packaged in an easy to open jar that contains 57 grams - 2 ounces of actual product weight that arrives shrink wrapped. A little goes a long way!

We don't have to tell you how much better dog noses work than human noses, you're smart and you already know that. Plus, you're doubly smart because you made the choice to purchase an all natural product that not only shows your love of a dog, but one that helps beautify the dog world one nose at a time. Our **DOG NOSE JOB** formula is made with non-toxic, human grade ingredients with 10 specifically selected natural oils, 3 natural nut butters, 7 high quality essential oils, candelilla wax and vitamin E. We don't skimp when it comes to sourcing excellent ingredients and we never will.

**Here's the fun part.** What you may not know, is that your dog probably won't want you coming directly at their nose with a finger. It might be a total surprise to them, much like someone walking straight up to you and suddenly, without warning putting a finger in your belly button. So, you may have to be somewhat sneaky and approach your dog by surprise from the side! After applying it, its natural (and safe) for your dog to lick at it. Playtime, a walk or a treat can be a good distraction after applying.

### Perform a Double Patch Test First

Since allergies can also occur with all natural products, we recommend that you perform a double patch test for any sensitivities before using. Apply a small amount of the product on your dog's skin in an area with little to no hair - we recommend patch testing under the armpit. Observe the area for 24 hours. If redness or inflammation occurs on the dog's skin, discontinue use. If after 24 hours there is no reaction observed on the skin - REPEAT the patch test and check again. If there is no reaction from the double patch test, it is safe to use as directed.

### Directions

Apply as needed to the outside of your dogs clean nose with your fingertip - let the balm melt on your fingertip before applying. A little goes a long way. Don't be mean and rub your dogs nose directly into the jar. Also, we shouldn't have to tell you not to ram this stuff into their nostrils, but - we're saying it anyway. Don't do it. **Store in a cool place away from direct sunlight.** For topical use only. If product is left in a warm environment, it will liquify - refrigerate temporarily to solidify.
